Summary of feedback 2020 - 2021

Healthwatch Worcestershire gathers feedback from those who use local health and social care services. This helps us to identify issues and concerns, decide what to focus on and tell those who run the services how they can improve.

In addition to our targeted surveys and engagement, people contact us to share their experiences. We can help people to find out more about local health and care services, signpost to other information, services and support available and explain how to raise the issue as a complaint if they wish to.

366 people contacted us to share their feedback and experiences of local health and social care services, from the beginning of April 2020 to end of March 2021.

How people contacted us

What people told us about

		Number of people
1	GP Practices	118
2	Worcestershire Acute Hospital NHS Trust	74
3	Herefordshire and Worcestershire Health and Care NHS Trust	45
4	Dentists	44
5	Social Care services	23
6	Covid-19, including testing and vaccination	23

9	Advocacy	5
10	Hospital services - other	4
11	Transport to hospital	3
12	West Midlands Ambulance Service	3
13	Investigation of cause of death	2

Other issues raised by an individual included - concern about lack of smoking cessation service, the response to a complaint from the Parliamentary and Health Service Ombudsman, care of individual with a brain injury, diagnosis of Autism Spectrum Condition for adults, concerns about healthcare at HMP Hewell and three issues relating to services used by relatives out of Worcestershire.

1. GP Practices

118 people gave us feedback about their GP practice.

- 28 people gave positive feedback, including praise for how practices had managed restrictions due to Covid-19
- 90 people raised issues and concerns

Issues and concerns

- **Appointments, communication and general dissatisfaction** - 33 people

Most of these concerns related to difficulty in getting appointments and contacting practice by phone. People also mentioned issues with obtaining test results and getting an appointment with a specific GP rather than a nurse.

- **Lack of face-to-face appointments / telephone consultations** - 27 people

People reported not being able to request a face-to-face appointment, concern about the effectiveness of telephone consultations, lack of specific timing or time slot for telephone appointments and frustrations that face-to-face appointments were still not possible once safety measures were in place following lifting of initial lockdown.

Specific concerns were raised about the effectiveness of remote consultations for those with limited access or experience using digital technology, such as the elderly and for those with sensory impairment. This includes an example of telephone appointment being offered to patient who is profoundly deaf.

- **Treatment and Diagnosis**- 20 people

Most of these concerns were about delays to and lack of diagnosis and treatment or misdiagnosis due to the use of telephone consultations and disruption to appointments such as blood test for PSA check, due to Covid-19. Concerns were also raised about the impact of lack of check-ups for long terms health conditions and reviews of medication as a result of the pandemic.

Other issues raised include failure to carry out further investigations, including making referrals, to obtain diagnosis.

- **Covid-19 restrictions** - 8 people

Concerns related to how practices had managed issues such as arrangements for arriving at the practice and waiting for appointments, guidance about wearing

of masks, social distancing and lack of communication from GP practice about changes implemented as a result of Covid-19.

- **Support for mental health** - 2 people

Two people told us that they were unhappy about the lack of support or onward referral they had received from their GP in relation to mental health, in one case for a child.

Other issues raised include -

- Failure to address issues raised in an official complaint
- Concerns about changes to medication
- Difficulties with online ordering of prescriptions
- Dissatisfaction with Learning Disability Annual Health Check
- Being unable to change GP practice
- Lack of BSL interpreter
- Administration procedure for Covid-19 vaccination

2. Worcestershire Acute Hospital NHS Trust

74 people gave us feedback about their experiences of Acute Hospital services.

- 14 people gave us positive feedback
- 60 people raised issues and concerns

Issues and concerns

- **Discharge from hospital** - 14 people

Concerns about the process for discharge, communication with patients and relatives and feeling that patients had been discharged from hospital too soon. In some cases, people felt this had happened as a result of pressures of Covid-19 on the hospital.

- **Quality of inpatient care** - 12 people

These included general dissatisfaction with the level of care provided, poor communication with patients and carers, lack of responsiveness of staff, poor experience of end of life care, patient having a fall, concerns about care for patient with Dementia, delays to treatment and admission following arrival by ambulance.

- **Delays to surgery or treatment** - 8 people

Concerns about the delays and length of waiting time for operations and delays to Cancer treatment due to impact of Covid-19.

- **Covid-19 - testing and infection control - 8 people**

Concerns about lack of Covid-19 testing before discharge, communication following testing while inpatient and on discharge, being discharged prior to being given positive test result and risk of catching Covid while an inpatient.

- **Diagnosis - 8 people**

Delays to gaining a diagnosis and in having procedures including endoscopy and MRI scan, being unhappy with diagnosis given, lack of diagnosis and misdiagnosis.

- **Outpatient appointments - 5 people**

Delays to and lack of outpatient appointments due to Covid-19, lack of communication regarding this and replacement of appointment with telephone call for eye check.

- **Accident and Emergency - 5 people**

Unhappy with quality of care, waiting times, waiting following arrival by ambulance and lack of support for individual experiencing mental health crisis.

- **Visiting restrictions - 3 people**

Impact of being unable to visit relatives due to Covid-19 on patient, communication with carers and in end of life situation.

- **Learning Disabilities - 2 people**

Concern about lack of support for individual in hospital with learning disabilities due to Covid-19 restrictions and about inappropriate use of Do Not Resuscitate orders.

Other issues included - concerns about hygiene and cleanliness, lack of availability of tongue tie procedure, criteria to access Long Covid service, difficulty parking and lack of information about public transport.

3. Herefordshire and Worcestershire Health and Care NHS Trust

45 people gave us feedback about services provided by Herefordshire and Worcestershire Health and Care Trust.

- 4 people gave us positive feedback
- 41 people raised issues or concerns

Issues and concerns
